

See the Human Body Like Never Before

AT THE COX SCIENCE CENTER AND AQUARIUM

Cox Science Center and Aquarium (CSCA) is proud to announce the debut of its newest cutting-edge interactive, the **Anatmage Table**, a state-of-the-art interactive experience offering visitors an unprecedented, immersive look inside the human body. The Anatmage Table is made possible through the generosity of **Janine and Jeff Yass**, residents of Palm Beach, whose philanthropic support reflects a deep belief

Jeff and Janine Yass

The Anatmage Table

in accessible, future-focused education.

Using real cadaveric imaging to create accurate, three-dimensional representations, the Anatmage Table brings anatomy, physiology and pathology to life in stunning detail. With the touch of a screen, guests can explore full-body systems, simulate cardiac motion, examine complex medical conditions and even practice virtual clinical procedures, transforming how learners of all ages engage with science and health education.

“We believe every young person should have the chance to discover how science connects to real life,” said Janine Yass. “The Anatmage Table allows students and families to explore the human body in immersive 3D, turning curiosity into understanding and opening pathways into future health and STEM careers. It has the power to inspire the next generation of health care professionals, and we are proud to help the Cox Science Center and Aquarium bring this powerful hands-on learning tool to the community.”

The interactive is located within CSCA's new **Innovation Station**, a hub for hands-on, technology-driven exploration. As CSCA continues to expand its role as a center for experiential STEM learning in South Florida, the Anatmage Table bridges the gap between textbook concepts and real-world application, offering an interactive platform where curiosity meets innovation.

The Cox Science Center and Aquarium's purpose is to “Open Every Mind to Science.” The Cox Science Center and Aquarium features immersive, educational exhibits, a 10,000-gallon aquarium, an outdoor science trail and more. The Cox Amphitheater hosts daily live science shows and special events. In 2021, the Center launched a transformative capital expansion campaign. Construction began in May 2024 with completion expected in 2027.

The Anatmage Table interactive exhibit is now open and included with general admission. General admission for adults is \$26, \$24 for teens ages 13-17 and seniors ages 60 and older, \$22 for children ages 3-12, and free for children under 3 years of age and CSCA members.
